

# MOD8: **Advanced Web Programming**

Project Assignment #2:  
Application Prototype

# TODO

For this assignment, you will need to have a functional shop with mocked data.

These elements must be implemented:

- All routes of your application
- Login/Register page
- Home page
  - Inside the home page, you must have a Shopping cart sidebar that is clickable
- Admin page that displays all products you want to edit

Finally, in your home & admin page, you will mock the data for now: images, prices, textes and titles.

We will connect it to our backend later in the course !

Note that you need any auth verification for now, only display all the pages using Vue.

# EVALUATION / 100

20% : Home page

20% : Login/Register page

20% : Admin Page

20% : Import correctly static data

20% : **Routes** and **components** hierarchy  
are correctly implemented
